"Thanks to Smart**Report** our employees can now log their hours quickly and easily using voice or text messages. This eliminates the need to manually complete timesheets, reducing the risk of errors and saving valuable time."

Robert J. Kane, CTO

ABOUT SMARTREPORT

The **AI based management software** that revolutionizes administrative reporting and streamlines **timesheet management**. Our product makes entering hours worked an efficient and accurate process, eliminating the complexity of traditional timesheets.

- **Intelligent Automation:**

Employees can log hours worked via voice or text messages, simplifying the process and reducing errors.

- **Seamless Integration:**

Our artificial intelligence transforms unstructured data into organized work reports, integrating with existing management systems.

WHAT ARE THE BENEFITS?

Control and Flexibility:

Administrators can validate, modify and export the processed data, maintaining quality control of the process.

Verification and Invoicing:

The administrative office has the ability to verify the hours entered by workers, keeping track of all hours worked.
